1 Introduction

If you are using this template, please cite this item from the references: Gaudecker von (2019)

Schelling (1969) example in the code is taken from Stachurski, Sargent (2013)

The decision rule of an agent is the following:

$$\begin{array}{ll} \text{move} & \text{if } n_{\text{neighbours}} < 4 \\ \text{stay} & \text{if } n_{\text{neighbours}} \geq 4 \end{array}$$
